

EVALUATION

For team teaching there was enough planning time. The instructions for the first team teaching could be more specific, especially according to the LAND topic. If we were supposed to talk about land it should have been somehow emphasised.

Is the goal to present the guest's country or to compare both countries.

TEAM TEACHING

Team teaching is exciting experience, we enjoyed doing everything together.

Carme prepared PPT presentation about Mallorca for class and Marina prepared „Tree presentation“ to relate the topic to Croatia (Osijek) and to bring the consciousness of the problems with trees (for the visual appearance of the city and the wood industry).

Students got involved, they were curious, asking questions about Mallorca and the interaction between students and teachers was positive. The atmosphere in the class was also positive. They were happy to meet Carme.

POSITIVE PEDAGOGY
